

Flex-Design Daisy Sprinkler Set

Add color to your garden

Place your Flex-Design Daisy Sprinklers throughout your garden to get water just where you want it. Once the system is in place, use a programmable water timer to set a watering schedule and let your system do all the work. The system is completely modular and can grow with your needs. The best part is, if you ever move, you can take it all with you and use it at your next place.

T-Connector

Hose Connector

Get Started:

Attach the garden hose to the Hose Connector.

Connect the hose to your faucet or water timer

Place the sprinklers in the area you want to water

Space sprinklers 3 - 13 ft. (1 - 4m) apart for best coverage. Each sprinkler waters up to 32 ft. diameter (10m).

Connect the Sprinklers:

Cut the hose to match the distance between sprinklers

Attach the hoses to the sprinkler by unscrewing the side hose connector

Insert the hose into the side hose connection then tighten the connector

Apply STOP End Cap at the end of circuit

Adjust the Spray:

Adjustable Spray
Direction

360°

Adjustable Spray
Width

1-360°

Flow Control to adjust the spray
distance

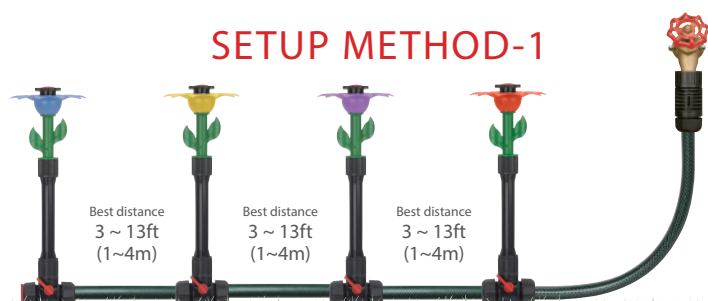

waters up to **33ft. (10m)**

T-Connector Set Up:

If your faucet is in the middle of your watering area, use the **T-Connector** to split the water flow into two directions.

SETUP METHOD-1

SETUP METHOD-2

Add Height:

Add the 5" **extensions** where needed to water over taller plants. Stack multiple extensions together to further increase the watering height (up to 2 max).

Turn the Water On!
