Metal Kink-Free Hose Connector, 2 Pc Set

No More Kinking or Twisting Hoses

Simplicity at its best. The Metal Kink-Free Hose Connector attaches to most U.S. standard garden hoses and watering tools making it easy to move the hose as you tackle all your outdoor watering chores. No more hose kinking or twisting helps save time and energy.

Once connected and your faucet is turned on, the water pressure activates the Connector for easy movement of your watering tools without the hose kinking or twisting. Even under high water pressure, like 120 psi, the Connector allows the hose to swivel preventing twists and kinks. When there is no water pressure, the connector locks itself. Simply push the Connector in towards the watering tool to remove from the hose.

FEATURES & BENEFITS

- Free-Spinning** – reduces kinks and twists in the hose
- Flexibility** – fits standard U.S. hose threads and watering tools
- Rugged Construction** – rugged aluminum core and metal threads for long-term use
- Ergonomic Design** – soft TPR grip for easy connection and disconnection
- Self-Activating** – water pressure enables free-spinning movement
- Pressurized** – easy rotation regardless of water pressure

Without Connector

Twisted and kinked hose

With Connector

No more twists or kinks

1. Attach the Connector to the hose.

2. Connect your watering tool to the hose and turn on the faucet.

3. Reduce hose kinks with all your watering tools such as oscillating sprinklers, wands, rotary sprinklers, and more.

⚠ CAUTION ⚠

- For outdoor use with cold water only
- Do not spray near electrical connections
- When not in use, rinse the tool with water to remove most of the dirt, dry your tool, and store indoors

⚠ WARNING: This product can expose you to chemicals including styrene, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.
