

TELESCOPING BYPASS LOPPER

The Eden bypass lopper is ideal for cutting thick branches and stems. Our 27-inch telescoping bypass lopper provides precise, even cuts. Enjoy years of use with our high-quality, durable Sk5 hardened carbon steel blades that resist rust and corrosion. The compound lever technology multiplies your strength, giving you 2x more cutting power than single-pivot loppers.

The four-stage telescoping handles extends up to 40 in. (102.5 cm), providing an extended reach for tall branches. The ergonomic, non-slip grips are made to ease hand strain while trimming. The Teflon coating prevents the blades from gumming up with sap and debris. The compound lopper provides a pulling cut that accurately cuts without leaving pressure marks on the wood.

Features & Benefits:

- Maximum cutting capacity: 1-3/4 in. (4.5cm) diameter
- Prune hard-to-reach branches or shrubs with our telescoping handle (up to 40 in. | 102.5 cm.)
- Quickly cut thicker branches with our compound lever design
- Ease hand strain with our ergonomic, non-slip handles
- Clean-up is a cinch with our Teflon-coated blades
- Durable carbon steel blades for years of continued use
- Backed by a 2-year limited warranty
