## Spray Coverage and Distance Adjustment

Adjust the range tabs and angle cap to change the spray coverage (from 5°up to 360°) and spraying angle to water just where you need without wasting water.

## Spray Pattern Adjustments

Depending on your watering needs, you can manually select from the various pattern settings :  
FLAT - The flat pattern will provide a flat wave of water.  
FAN - The fan pattern disperses water in a wide fan shape.  
MIST - This pattern is useful to cool down a small area.  
LARGE - This pattern covers the maximum area.  
MULTI - This is a combination of the Flat, Fan and Large patterns.

## Level Adjustment Indicator

Higher level will create a higher arc resulting in greater water coverage.

Lower levels will reduce coverage.

Convenient indicators are included to help setup when you need to water again.

### WARNING:

Intended for outdoor agricultural or horticultural use only. This is not a toy. Severe electrical shock could result if water is sprayed into outlets or sources of electrical current. Do not use water more than 115°F (46°C). Do not use when the ambient air temperature is less than 40°F (4.5°C). When not in use, drain and store indoors away from freezing temperatures.

The Quick Connect Adapter (2 pcs) and Hose Connector with Water Stop (1 pc) simplify your watering experience. Simply attach the connector at the end of your hose. Then, connect the adapters to your watering tools. Interchange various tools in a snap without turning off the water as the adapter will stop the water flow. No more kinking or hose twisting as the adapter allows the hose to swivel 360 degrees.
